- *Wide range of teat sizes*
- *Fits perfectly into stainless steel 06 style shells*

• EVOLUTION[®] X

**We set the standard
in high-performance,
low-vacuum milking.**

The gentle giant of the milking parlor.

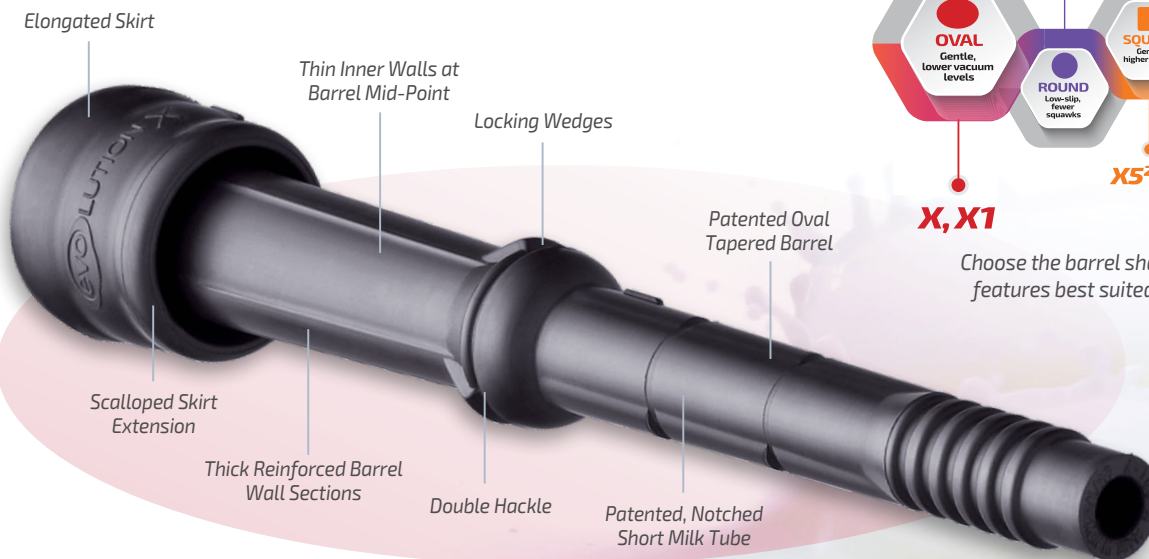

Evolution X is engineered for high-performance and low-vacuum milking. Attaches securely with virtually no slippage, for fast, gentle, low-vac milk-out.

Ultimate cow comfort comes from the patented oval tapered barrel. It opens and closes with less vacuum, and the shorter tube allows better alignment and flow.

Designed to last – up to 1,500 cow milkings! Water and dirt stay outside the shell for cleaner vacuum hoses and better pulsator reliability.

Fits stainless steel 06 style shells
