

DHI-Plus *herd management*

Outstanding customer support. Get powerful results your way. Manage treatment data accurately. Make informed decisions anywhere, anytime.

Pocket DHI-Plus RFID

- Gain efficiency for vet check, synchronization programs, vaccinations, inventories, string changes, treatments and more.
- Reduce labor costs and improve accuracy.

Rx-Plus

- Record and track treatments to meet compliance standards.
- Run daily treatment lists and manage withhold times for milk and meat.

Herd Analysis

- Analyze repro data, preg rates and conception.
- Evaluate production/repro/health with flexible Cohort Analysis tool.

Equipment interfaces / Networking

- Interface with milking equipment and heat detection systems to eliminate double data entry.
- Network DHI-Plus software across multiple PCs for ultimate accessibility.

DHI-Plus Mobile

- Access individual cow data and view key dashboard reports from your phone or tablet
- Instant access anytime, anywhere for dairy personnel, nutritionist, veterinarian, etc.

Records PROCESSING *secure data*

Since 1954, Amelcor has been processing thousands of dairy herds records. We are a QCS certified Dairy Records Processing Center. On top of records processing we also offer secure backup to dairy producers.

- Powerful dairy management records processing reports (paper or digital).
- DHI-Plus software allows your records to be delivered and analyzed electronically.
- Herd Summary, Individual Cow Pages, Hot List and many other test day management reports.
- With eReports receive test day reports via email instantly once herd records are processed.
- Receive Genomics data from CDCB and genomics nominators into DHI-Plus software with opt-in.
- Secure data backup with disaster-recovery procedures in place.

 **amelcor** Let's go to work.

EZfeed

feed management

EZfeed software is used to feed over five million cattle every day all over the world. It is the tool preferred by top dairies both nationally and internationally. EZfeed is the ultimate Feed Management System because of its powerful capabilities, including (but not limited to): Analyzing, reporting, and maintaining feed data.

With EZfeed you can:

- Set up unlimited number of ingredients, pens, rations, premixes, feedings, mixers or users.
- Track milk production and components by tank, pen, or pen groups.
- Access more than 100 standard reports and graphs covering basic needs of most operations.
- Easily modify report views by date ranges, time periods, and pens or groups.
- Create unlimited custom reports and graphs to meet current and future needs.
- Account for Refusal/ Weigh-back/ Push-out feed and incorporate into other rations.
- With EZfeed Mobile service you can get real-time feed data and make changes to:
 - Ingredient inventories.
 - Ingredient dry matters.
 - Pen counts, bunk calls and target feed amounts

EZweights

commodity tracking

EZweights is a dynamic weigh scale program to track any commodity coming across a scale to and from an operation. EZweights can be easily customized to simplify the weigh-in/ weigh-out process for truck drivers and ensures that you get the information you need.

- Easily track and calculate the data you need.
- Simplify report generation.
- Integrates with EZfeed.
- Record bill of lading, sample info, dry matter percentage, hauling costs, etc.
- Compute per-unit yield values (ex. Average bale weights, tons per acre, etc.)
- Adjusts costs and yields to a fixed dry matter percentage value.

EZweights can run standalone or can be integrated with the EZfeed feed management system to transfer ingredient and inventory information (feed and milk.) All in all, EZweights will save you time, which will save you money.
