

FOR IMMEDIATE RELEASE

Patriot, the esteemed electric fencing brand under Datamars Livestock, is thrilled to introduce two innovative models that enhance the lineup of portable solar energizers, **SG2000 and SG3500**. These state-of-the-art devices underscore our unwavering commitment to providing farmers with environmentally conscious solutions, enabling them to adopt sustainable practices while ensuring the well-being and security of their livestock and crops.

Patriot's portable solar energizers, designed for effortless installation and optimal efficiency, harness solar power to deliver dependable electric fencing. Aligned with the global emphasis on sustainability, these new models perfectly cater to the escalating demand for eco-friendly farming equipment.

Key Features of the New Models Include:

- **Enhanced Design:** Patriot's renowned solar energizer design, now featuring larger panels and batteries with options of 2 J and 3.5 J.
- **Diverse Operating Modes:** Four power modes (full, half, day, night) catering to power needs and conserving energy intelligently.
- **Voltage Indication:** Indicator lights displaying energizer output performance for quick fence inspection.
- **Robust Build:** Large, user-friendly terminals, easily accessible battery compartment, and ergonomic handle designed for one-handed use in challenging environments.
- **Versatile Mounting:** Familiar design for mounting on wood or steel posts.
- **Effortless Installation:** Simple setup of these portable energizers, making them ideal for remote locations or rotational grazing systems.
- **Environmental Friendliness:** Reduction in reliance on conventional power sources, contributing to a cleaner and more sustainable planet.
