

The size and scope of

CANADA'S DAIRY INDUSTRY

compared to the U.S.

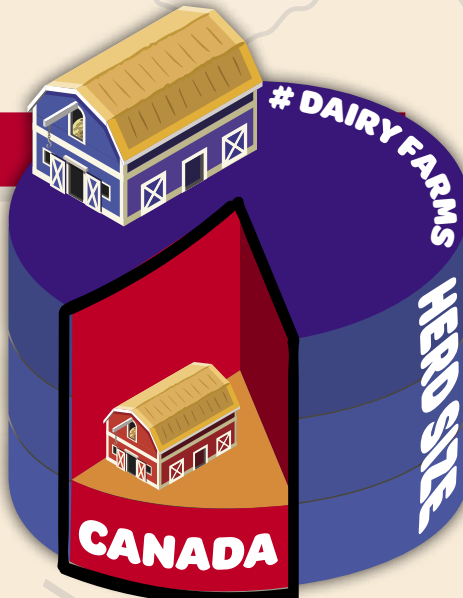

Canada's population is roughly 1/10th of the U.S. population; There are fewer people living in Canada than the state of California.

Total exports: Canada \$399 million; U.S. \$7,060 million*
Total imports: Canada \$872 million; U.S. \$4,317 million*
Net trade: Canada -\$473 million; U.S. +\$2,743 million*
 *In Canadian dollars

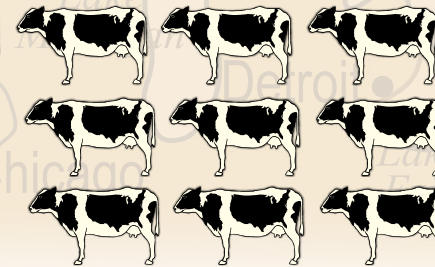

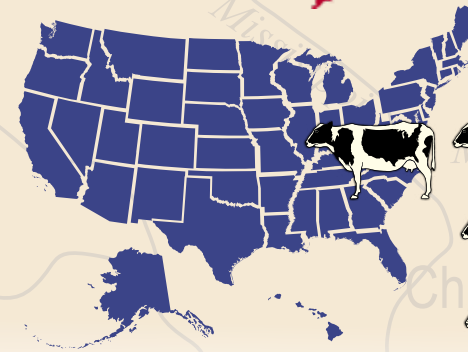

Canada imports twice as many dairy products per capita than the U.S.

Canada exports of skim milk powder are almost 12% of the amount exported by the U.S.

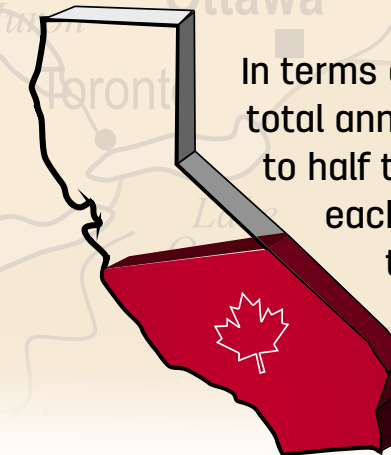

The U.S. has almost 4X the number of dairy farms compared to Canada and its average herd size is almost 3X the size.

Cow numbers mimic human numbers with Canada having 1/10th the number of cows as the U.S.

In terms of milk production, Canada's total annual milk production is equal to half the milk produced in California each year or 9 percent of the total milk produced in the U.S. last year.

DAIRYMAN FINDS "the perfect loader"

I've been around a long time and let me tell you, there is no other loader like it. Having the seat in the middle makes it much safer. I am also able to have a much better view of what I am doing as I am able to see all around. This loader is a well-built machine. It is so versatile. We use it all over the operation (scrapping, loading feed, moving hay bales). Since it is a telescopic it has good lifting ability. Ours is the first one operating in the United States (although there are 30 dairies using them now in Canada).

Kenny Durst
 Durst Bros. Dairy (milking 1,700)
 Mantorville, MN

COMPACT LOADERS

15 KW - 37 KW (20 HP - 50 HP)
 Lifting Capacity: 1,200 kg - 2,300 kg

WHEEL LOADERS

37 KW - 75 KW (50 HP - 102 HP)
 Lifting Capacity: 2,400 kg - 4,200 kg

TELESCOPIC WHEEL LOADERS

33 KW - 115 KW (45 HP - 157 HP)
 Lifting Capacity: 1,900 kg - 45,300 kg
