

<div> <div>TABLE 1</div> <div>Differences between high genetic merit (HGM) and low genetic merit (LGM) groups in Australian Breeding Value (ABV) and actual production for fat plus protein yield for each level of concentrate</div> </div>				
		Differences in actual production between HGM and LGM groups		
Milk component	Differences in ABV between HGM and LGM groups	Low concentrate	Medium concentrate	High concentrate
Fat plus protein	46.8	27	48	51
Fat	28.9	21	28	35
Protein	17.9	6	20	16
