

A trial on 15 farms totaling 32,000 dairy cows and 640,000 tons of corn silage analyzed  
Silo-King® treated corn silage against competitor-treated corn silages

## LAB SAMPLE AVERAGES

SK#3381

# SILO-KING®

## WHAT SETS SILO-KING® APART?

### ★ LESS HEATING

Silo-King® uses **antioxidants** to scavenge oxygen within the forage or grain, minimizing respiration and heating to reduce dry matter loss and retain more nutrients.

### ★ INCREASED DIGESTIBILITY

The **enzymes** in Silo-King® break down the cell wall and predigest stem fibers or grain, allowing the fiber or grain to be digested easier within the animal's rumen.

### ★ IMPROVED BUNK LIFE

Using **three proprietary strains of bacteria** to guide the ensiling process, Silo-King® helps control spoilage and heating to minimize dry matter loss.

### ★ ENHANCED PALATABILITY

Silo-King® reduces spoilage, retaining sugars to reduce secondary fermentation, which allows for improved palatability for livestock.

### ★ MORE ENERGY

Silo-King® improves digestibility and nutrient retention, resulting in higher quality feeds with more available energy.

## INCLUDED SERVICES

- **Support in harvesting forage**
  - PEAQ stick
  - Tissue testing
  - Harvesting practices
- **Bunker management**
  - Temperature checks
  - Density testing
  - Bunker audits
- **Lab analysis services**
  - Forage tests at no extra cost for clients
- **Applicators**
  - Sales and tech support for clients on all Silo-King® applicators and controllers
