PRODUCT GUIDEBOOK

A Measurable Difference

DATAMARS
Livestock™

We are dedicated to providing a more comprehensive, integrated livestock management portfolio. As a result, we have united our product brands under a single family – Datamars Livestock.

Our goal is to provide producers with the essential tools to meet the increasing global demand for high-quality protein. The journey begins with tag identification at birth. As animals grow, our products meticulously track data insights, facilitating fact-based decision-making. Our animal health delivery systems ensure dose accuracy, safety, and efficiency, thereby saving time and reducing stress. Taking it a step further, our line of livestock scales and EID readers collect real-time data for effective management throughout the animal's life cycle.

With a strong track record of partnering globally with the pharmaceutical industry on confidential and market-sensitive projects, our collaborative and professional approach has earned us exceptional customer retention. Through stringent quality standards and innovative development, NJ Phillips and Simcro product lines enhance the value of pharmaceuticals and vaccines for production livestock. Our product hallmarks include dose accuracy, user safety, operational convenience, and animal welfare. During the design stage, our engineers consider end-user environments to manage health, safety, and animal welfare risks. All products undergo rigorous testing in both field trials and our in-house laboratories. Integrity is fundamental to our design, ensuring that customers receive an uncompromising end product. Our specialty packaging can be tailored to meet specific brand requirements.

At Datamars Livestock, we take pride in delivering quality products and exceptional service. We believe in the future of agriculture and are ready to assist with any challenges at hand.

We empower producers by enabling data-driven decisions, ensuring consistent and profitable results. We support you through everyday livestock production needs, with innovative technology aiding day-to-day tasks. Our tools enhance animal health, precision management, and protein production, working seamlessly together and with you. Whether in the field or online, our digital platform provides real-time livestock information, enhancing decision-making. Our products not only work together but, more importantly, work for you.

Datamars Livestock, a division of the global company Datamars, Inc., is a leading provider of precision livestock management solutions. Our top-quality tools, including Tru-Test, Z Tags, Patriot, and others, support efficient and profitable livestock management. Backed by the Datamars Livestock cloud software, our products offer real-time data for producers.

TERMINOLOGY

Barrel: The part of an injector which functions to measure and contain the medication fluid. The plunger forces fluid through the barrel and out through the needle.

Fixed Dose: The device has a single fixed dose option on the indicator window. A dose selector is present on the device, but it cannot be adjusted or moved.

Forward Selectable: The non-slip selector enables easy and accurate dose selection, preventing product loss when adjusting the dose setting. When smaller dose sizes are selected, the plunger moves further forward along the barrel. It uses a positive stroke to displace the entire dose in the barrel, ensuring accuracy and maximum efficacy. This configuration reduces bubbles and quickly removes them from the system, ensuring accuracy and efficacy.

Oral Drencher Application: Administering medicine dosage or liquid preparations directly into an animal's stomach by mouth is commonly known as drenching. This method is widely used for various treatments, including worm remedies (anthelmintics), addressing conditions like bloat, diarrhea, constipation, and other medicinal applications.

PLT Needle Connection: A platelet count (PLT) test assesses the quantity of platelets in the blood. Platelets, also known as thrombocytes, are cells produced in bone marrow. Its crucial role involves clotting the blood in response to damage to a blood vessel wall, preventing excessive bleeding.

Polypropylene Plastic Barrel: Some injectors offer optional polypropylene plastic barrels for use with medications requiring increased chemical resistance. These barrels have a "cloudy" appearance and are less transparent, however they can handle harsh medications.

Polysulfone Plastic Barrel: Most injectors come standard with a barrel made of polysulfone plastic which is compatible with most medications except those requiring increased chemical resistance. These barrels have the benefit of being more transparent for easy volume reading.

Pour-on Application: For thinner medications that absorb into the skin and are generally applied along the back of an animal. Comes off in a spray-like manner for quick, easy, and safe application. It does not require animals to be contained.

Reverse Selectable: The non-slip selector enables easy and accurate dose selection, preventing product loss when adjusting the dose setting. Once the dose is selected, the plunger will remain at the back of the barrel. At low doses, the plunger acts on a full barrel, making the air in the system challenging to purge as air bubbles compress rather than expel. If bubbles go unnoticed, they can lead to the animal's underdosing and reduce efficacy.

Selectable Repeaters: Device has a dial that can be adjusted to pre-set dose size, the plunger moves towards the end of the barrel while each dose is administered and fully emptying the barrel at which point it can be refilled.

Variable Dose: Allows precise dosage selection and flexible adjustment without the need to change syringes or applications. It allows for quick and easy switching between doses, with fine-tuning against the plunger and barrel markings as needed.

Variable Lock: The non-slip selector allows easy, accurate dose choice and flexible dose adjustment. Variable lock dose selection can be fine-tuned against the front of the plunger and dose indication markings on the barrel (unless otherwise stated on the device).

Tube Fed & Bottle Mount Injectors

njphillips
DATAMARS

Simcro
DATAMARS

Designed with a textured non-slip finish, our bottle mount and tube-fed injectors feature an ergonomic grip, reducing hand strain during prolonged use. The simple yet precise dose selection includes an easy-grip volume control for accuracy. Available dose control settings include fixed, variable, reverse selectable, and forward selection, providing versatility when administering vaccinations. Most of our injectors come with three draw-off cap sizes and a tube to fit most 50mL – 500mL bottle sizes (refer to the description of each injector for specific details). Constructed with strong, durable material, they ensure long-lasting performance.

Metal injectors are exceptionally robust, offering maximum durability and reliability in any environmental conditions. They are highly accurate and versatile, with easy-to-read barrel dose gradations. The superior ergonomic design features an easy-to-push handle for prolonged use across a variety of livestock.

Compact injectors are both durable and economical. This award-winning design offers variable dose control selection and is easily interchangeable from a tube-fed to a bottle mount. Designed to be compatible with our topical pour-on and oral drench nozzles, it comes in three dose range sizes. For assembly instructions, see page 10.

850 0000-355 SERVICE KIT

5mL Compact Variable Bottle Mount Injector

Dose Range: 0.5mL – 5mL
Dose Increments: 0.5mL
Includes: 20mm Small & 30mm Large Bottle Adapter
850 0000-020

0.5mL Bottle Mount Variable (BMV) Injector

Dose Range: 0.1mL – 0.5mL
Dose Increments: 0.1mL
Includes: 20mm Small Bottle Adapter
850 0000-021

2mL Bottle Mount Variable (BMV) Injector

Dose Range: 0.2mL – 2mL
Dose Increments: 0.2mL
Includes: 20mm Small & 30mm Large Bottle Adapter
850 0000-025

6mL Bottle Mount Variable (BMV) Injector

Dose Range: 0.5mL – 6mL
Dose Increments: 0.5mL
Includes: 20mm Small & 30mm Large Bottle Adapter
850 0000-022

TUBE FED ACCESSORIES

2mL Metal Automatic Tube Fed Major Kit

Includes: Cylinder (Barrel); (4) O-rings; Values & Springs; Return Spring
850 0000-142

5mL Metal Automatic Tube Fed Major Kit

Includes: Cylinder (Barrel); O-ring; Piston Washer; Cup Support Washer; Head Seal Washer
850 0000-055

**PREMIUM
2mL Variable Tube Fed Major Kit**

Includes: 2mL Barrel; (5) Spare O-rings
850 0000-356

**PREMIUM
5mL Forward Selectable Tube Fed Major Kit**

Includes: 5mL Barrel; (5) Spare O-rings

5mL Variable Bottle Mount Major Kit

Includes: 5mL Bottle Shroud; (5) Spare O-rings
850 0000-355

ASSEMBLY INSTRUCTIONS

Fixed Instructions:

(1) Device has one fixed dose option printed on the indicator window. (2) Dose selector is present on the device but cannot be moved.

Variable Instructions:

To set the dose, rotate the dose selector (1) either clockwise or counterclockwise until the front of the plunger aligns with the required dose marked on the barrel (2-3).

Forward Selectable Instructions:

To set the dose, squeeze the injector handles (1). Then, turn the dose selector clockwise or counterclockwise until the desired dose is visible in the dose window (2). Once the required dose is displayed, release the injector handles to open them as usual (3).

Reverse Selectable Instructions:

To set the dose, rotate the dose selector (1) either clockwise or counterclockwise until the desired dose is visible in the dose window (2).

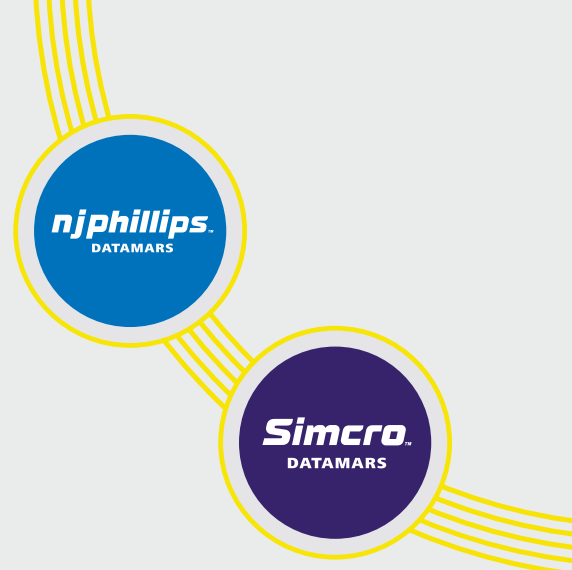

Nylon Syringe / Variable Lock Instructions:

To set the dose, first, turn the nut lock counterclockwise. Then, (2) rotate the dose selector either clockwise or counterclockwise until the front of the plunger aligns with the required dose indicated on the barrel. Finally, turn the nut lock clockwise to secure the dose setting (3).

VS Injectors

2mL & 5mL

The ultimate all-in-one injector

The VS Injector is designed with ultimate flexibility for cattle producers. Packed with features to protect both people and livestock, it delivers accurate fixed-dose volumes safely and effectively. The ergonomic design provides a comfortable grip for sustained use. This assembly is adaptable, transitioning seamlessly from a bottle mount to a tube-fed injector. Interchangeable dose chambers are available in 0.5mL, 1mL, 2mL, and 5mL sizes, each easily identifiable by its color-coded ID band. It adheres to treatment protocols by providing accurate and precise fixed doses for a variety of vaccines and medications. The entire injector can be boiled to meet sterilization protocols, ensuring sanitation and food safety standards are met. Color ID bands simplify matching the injector to a specific treatment. Easily administer subcutaneous and intramuscular injections to comply with Beef Quality Assurance (BQA) requirements, promoting animal well-being.

For assembly instructions, see page 16.

VS INJECTOR ASSEMBLY

Bottle Mount Assembly

Tube Fed Assembly

Dose Conversion Kits Assembly

1. Remove the Needle Guard Assembly by locking it and pulling the locking ring forward, keeping the handset locked.
2. Slide the Dose Chamber down and forward to detach it from the Handset.
3. Unscrew the Retainer Cap.
4. Use the Needle Guard assembly to unlock the assembly and compress the Needle Guard into the housing to expose two prongs. With one of these prongs, push upwards on the Plunger Head (from the underside) to remove the Retainer
5. Choose the appropriate Plunger Head, lubricate the o-ring, insert it into the Dose Chamber, and secure it with the Retainer Cap.
6. Slide the Dose Chamber back onto the handset, ensuring correct alignment with the Plunger Push Rod.
7. Replace the Needle Guard assembly by locking it and pushing it back into the Dose Chamber.

NOTE: Remove plungers from family tree by rotating them for the connection break; cutting not necessary. Remember to lubricate o-rings before use. Use black inlet and outlet valve assemblies for low dose applications.

VS Injector

Dose Conversion Kits

Versatility & Accuracy in One Powerful Tool

NJ Phillips & Simcro Dose Conversion Kits are explicitly designed for the VS Injector, offering additional dose configurations for a variety of vaccines and animal treatments. When paired with the versatile VS Injector, these kits enable the administration of precise subcutaneous and intramuscular ensuring accurate dosage and efficient delivery. This not only promotes optimum animal welfare but also enhances operator safety. For assembly instructions, see page 16.

Metal & Pistol Grip Repeater Syringes

Metal Repeater Syringes

NJ Phillips 25mL / 50mL Metal Repeater Injector features an ergonomic handle designed for the mass administration of various vaccines. This injector is easy-to-clean and maintain, with fixed settings that ensure convenience and efficiency. The dosages are in 0.5mL graduations and the injector fills through the tip.

Pistol Grip Repeater Syringes

NJ Phillips 25mL / 50mL Pistol Grip Repeater Injector offers 5 fixed-dose settings for cost-effective, reliable, and durable use. With a built-in needle magazine for time efficiency and ergonomic fingertip action, it doses in 1.0mL graduations. Injectors fill through the tip and saves time when changing out needles. Additionally, this product is available with a Polypropylene Barrel option for increased chemical resistance.

For assembly instructions of Metal and Pistol Grip Repeaters, see page 21.

REPEATER ASSEMBLY

To set the dose, first, press the button on top of the device, ensuring that the spring underneath is fully compressed. Then, pull the barrel plunger to the back of the barrel (1). Next, turn the dose selector either clockwise or counterclockwise (2) until the desired dose aligns with the arrow at the top of the device (3).

Nylon Syringes

Nylon syringes are designed for one-hand operation and are easy to disassemble. Our nylon syringes fill through the tip and have an ergonomic handle. The dose can be easily set using the dosing lock, conveniently located just above the barrel. These injectors are reusable and easy to clean, making them an essential tool for any operation. See page 11 for assembly instructions.

Pour-on & Oral Drenchers

Our Pour-on and Oral Drencher product line is designed with ergonomic aesthetics to minimize hand strain during extended use. These options come with selectable and variable dose control settings, catering to various dose ranges suitable for swine, goats, cattle, and horses.

Specifically tailored for administering a wide range of oral anthelmintics, our Oral Drenchers prioritize operator comfort, ease of administration, accuracy, and durability. Years of refinement have yielded a comprehensive range of oral options, featuring tube fed connections and non-drip nozzles for added convenience. Furthermore, the Oral Drencher design is reliable and robust, making it suitable for use in demanding environments.

Our Pour-on applicators boast a smooth-action V-grip handle, selectable 'dial-a-dose' adjustment, and an angled nozzle with an in-built diffuser. The angle nozzle can be rotated and locked at the desired angle, while the diffuser helps minimize run-off during higher application rates. Additionally, the dose adjustment system is user-friendly.

Features & Benefits:

ERGONOMIC DESIGN

MAXIMIZE EFFICIENCY

ACCURACY

DURABLE CONSTRUCTION

VARIETY OF VACCINES

ACCESSORIES

20mL Metal Oral Drencher Major Kit

Includes: Cylinder (Barrel); (5) O-rings; Values & Springs; Return Spring; Piston; Level Pad; CirClip; Lubricant Bottle; Lubricating Washer; Pushrod Guide

850 0000-138

POUR-ONS & ORAL DRENCHERS

12.5mL Bottle Mount Multi-doser Oral Drencher Applicator

Suitable for 500mL & 750mL Bottles
Dose Range: 1mL – 12.5mL
Dose Increments: 1mL
Includes: 125mL Bottle Shroud

850 0000-114

15mL Variable Tube Fed Pour-on & Oral Drencher Applicator

Dose Range: 1mL – 15mL
Dose Increments: 1mL
Includes: Tube; 1/4" Drench Oral Nozzle

850 0000-049

15mL Reverse Selectable The Ranch Pack Applicator

Dose Range: 1mL – 15mL
Dose Increments: 0.5mL
Includes: 15mL Optimiser™ Injector; 15mL barrel; Metal Drench Nozzle; Plastic Pour-on Nozzle; Tube; 20mm, 27mm, 33mm Draw-off Caps; (4) 16G 1/2" Needles

850 0000-010

20mL Metal Variable Pour-on & Oral Drencher Applicator

Dose Range: 1mL – 20mL
Dose Increments: 1mL
Includes: 4" Sheep Nozzle; 6" Cattle Nozzle

850 0000-138 SERVICE KIT

30mL Variable Tube Fed Oral Drencher Applicator

Dose Range: 1mL – 30mL
Dose Increments: 0.5mL
Includes: 450mm Cattle Nozzle; Tube

850 0000-036

60mL Variable Tube Fed Pour-on Applicator

Dose Range: 5mL – 60mL
Dose Increments: 5mL
Includes: Tube; Pour-on Nozzle

850 0000-050

65mL Tube Fed Pour-on Applicator

Dose Range: 2.5mL – 65mL
Dose Increments: 2.5mL
Includes: Tube; Fan Nozzle

850 0000-120

70mL Magnum Selectable Tube Fed Pour-on Applicator

Dose Range: 10mL – 70mL
Dose Increments: 2.5mL
Includes: Tube

850 0000-047

Disposable Needles & Syringes

Quality Products, Exceptional Service & Support – One Stop Shop for Animal Health Solutions

NJ Phillips brand of syringes is a suite of animal health management solutions including needles, syringes and combos. A clear polypropylene barrel with large easy-to-read graduations support accuracy when administering vaccines and treatments. The ultra-sharp needles are color coded for easy identification. Quality disposable needle and syringe product line compliments our Animal Health Delivery Systems (AHDS) products. See page 35 for how to choose the correct needle or syringe.

Production Products

PowerMaster Series

The PowerMaster Series—a robust, user-friendly powered device designed for the administration of injectable, topical, and oral animal health vaccines. It ensures precise and consistent dosing at the beginning and end of each run. Engineered to meet the demands of high-productivity livestock operations, the PowerMaster Series guarantees durability and ease-of-use. For assembly instructions, see page 34.

- ✓ Powered by Compressed Air
- ✓ Ergonomic Handle for Relaxed Grip
- ✓ Accurate Dose Delivery
- ✓ Quick Refill Action
- ✓ Administers a Variety of Medications
- ✓ Easy Cleaning with Removable Barrel
- ✓ Repair & Service Kits Available

Sekurus™ Reverse Selectable Tube Fed Injector

The Sekurus™ range of safety injectors has undergone an extensive development process over several years, which involved thorough field trials conducted in various countries. Allows users to administer reliable, accurate, and safe single-handed subcutaneous injections. The patented two-stage mechanism is specifically crafted to ensure precise penetration and consistent dose placement with self-tenting technologies, whether in deep subcutaneous or intramuscular applications. For assembly instructions, see pages 10–11.

- ✓ Patented Self-tenting technologies
- ✓ Needle Guard reduces injuries
- ✓ Quick change for maximum efficiencies
- ✓ Safe operation in chutes
- ✓ Less invasive to the animal
- ✓ Accurate dosage in subcutaneous zone
- ✓ Reduces needle damage

VS Injector Bottle Mount & Tube Fed with Needle Guard

The VS Injector with Needle Guard is designed with ultimate flexibility for swine producers. For more information, see page 12 and assembly instructions on page 16.

- ✓ Ergonomic Design
- ✓ Versatility
- ✓ Compliance
- ✓ Sanitation & Food Safety
- ✓ Identification
- ✓ Animal Well-being

PRODUCTION PRODUCTS

15mL PowerMaster Pneumatic Air Tube Fed Injector

Dose Range: 1mL – 15mL
Dose Increments: 1mL
Includes: Injector; Tube (114mm X 1500mm)

850 0000-038
850 0000-233 SERVICE KIT

50mL PowerMaster Pneumatic Air Tube Fed Oral Drencher Applicator

Dose Range: 5mL – 50mL
Dose Increments: 2.5mL
Includes: Drencher; 11" Stainless Steel Hook Nozzle; Tube Feed Hose (114mm X 1500mm)

850 0000-037
850 0000-148 SERVICE KIT

65mL PowerMaster Pneumatic Air Tube Fed Pour-on Applicator

Dose Range: 5mL – 65mL
Dose Increments: 5mL
Includes: Pour-on; Tube (114mm X 1500mm)

850 0000-039
850 0000-139 SERVICE KIT

2mL Sekurus™ Reverse Selectable Tube Fed Injector

Patented Technology.
Dose Range: 0.5mL – 2mL
Dose Increments: 0.5mL
Includes: Small, Medium & Large Vented Draw-off Caps; Tube; 16G 3/4" Detectable Needle

850 0000-008

12mL Sekurus™ Reverse Selectable Tube Fed Injector

Patented Technology.
Dose Range: 2.5mL – 12mL
Dose Increments: 0.5mL
Includes: Small, Medium & Large Vented Draw-off Caps; Tube; 16G 1/2" Detectable Needle

850 0000-009

VS Injector with Needle Guard

2mL Injector Dose Range: 1mL – 2mL
Dose Increments: 0.1mL
5mL Injector Dose Range: 1mL – 2mL
Dose Increments: 0.5mL

850 0004-130 TF
850 0004-131 TF

ACCESSORIES

15mL PowerMaster Tube Fed Major Kit

Includes: Cylinder (Barrel); O-rings; Value & Spring
850 0000-233

50mL PowerMaster Oral Drencher Major Kit

Includes: Cylinder (Barrel); O-rings; Value & Spring
850 0000-148

65mL PowerMaster Pour-on Major Kit

Includes: Cylinder (Barrel); O-rings; Values & Springs
850 0000-139

POWERMASTER ASSEMBLY

1. Connect the feed tube to the PowerMaster
2. Connect the air supply from the compressor
3. Prime the PowerMaster and it's ready to operate

2.5L Backpack: 850 0000-068
5L Backpack: 850 0000-069

See instructional manual for full details on operating this device.

Choosing the Correct Needle or Syringe

njphillips
DATAMARS

Simcro
DATAMARS

Needle and syringe sizes vary based on factors like animal species, size, and injection type.

- 1** What type of injection or route of administration does the vaccine or treatment product require?

- Intramuscular (IM): Neck or Shoulder muscle
- Subcutaneous (SQ): Space under the skin

- 2** Type of Needle:
Aluminum Hub vs Polypropylene Hub

- Aluminum Hub: Durable, Multi-Use
- Polypropylene Hub: Single Injections, Small Animal & Equine

- 3** Type of Syringe

- Luer Lock: Secure connection by threading for a "locking" fit onto the syringe.
- Luer Slip: Quick to change, push on friction-fit connection.
- Catheter Tip: Used for flushing/cleaning catheters, tubes, etc.

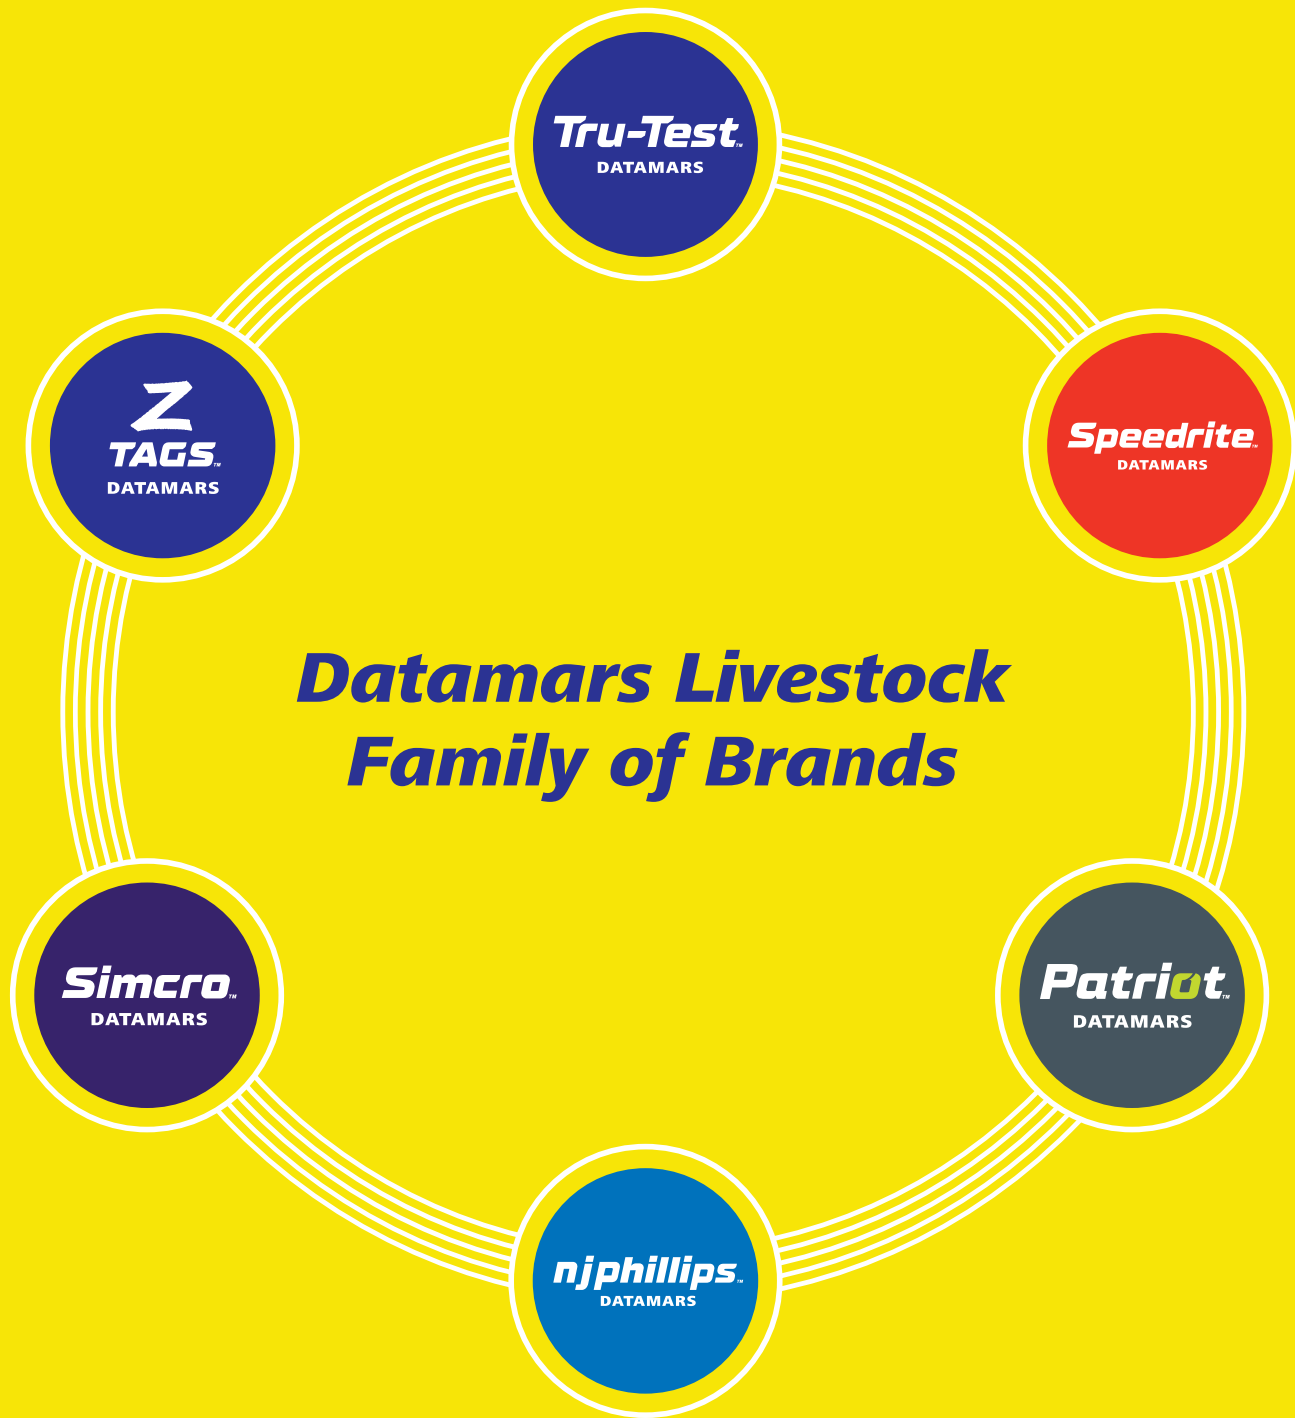

- 4** Determine Needle Size

	SUBCUTANEOUS (SQ)		INTRAMUSCULAR (IM)	
	Gauge	Length	Gauge	Length
Small Animal	22	3/4"	22	1"
Sheep & Goat	20	1/2" - 3/4"	20	1" - 1 1/2"
Swine	18	1/2" - 3/4"	18	1" - 1 1/2"
Piglets	20	1/2"	20	3/4"
Cow	16	3/4" - 1"	16	1" - 1 1/2"
Calf	18	3/4"	18	1"
Equine	20	1"	20	1" - 1 1/2"
Foal	20	3/4"	20	1"

Basic Injection tips

- Always follow label instructions on the product label for proper dosage and administration.
- Ensure a clean and dry injection site to prevent infections.
- Clean the animal's injection site to avoid contamination.
- Choose the smallest practical needle size based on animal size and consider the product viscosity when selecting needle gauge.
- Space multiple injections across several inches or inject different sides of the animal to avoid concentration in one area.

NOTE: The information shown here has been gathered from many sources and with great care. We always recommend consulting your veterinarian about proper and safe injection administration.
