

## FOR IMMEDIATE RELEASE

Datamars Livestock proudly introduces the extension of the NJ Phillips VS Injector Line: VS Dose Conversion Kits, revolutionizing the administration of animal health vaccines and treatments. These versatile kits enable easy adjustment of dose sizes, ensuring optimal animal welfare, operator safety, and treatment efficacy when paired with the VS Injector.

Designed to meet compliance and safety requirements, the NJ Phillips VS Dose Conversion Kits allow doses to be configured using the fixed Dose Chamber. With a simple adjustment, the VS Injector dose chamber accommodates different dosages, eliminating the need for multiple injectors and simplifying the administration process. The injector dosage is interchangeable depending on the size of the dose chamber. Below is a table outlining the fixed doses for each existing dose chamber size:

Description	SKU	Dose Range
0.5mL VS Dose Conversion Kit	850 0004-874	0.1 – 0.5 mL (0.05mL Increments)
1mL VS Dose Conversion Kit	850 0004-875	0.5 – 1 mL (0.05mL Increments)
2mL VS Dose Conversion Kit	850 0004-876	1 – 2 mL (0.1mL Increments)
5mL VS Dose Conversion Kit	850 0004-877	2 – 5 mL (0.5mL Increments)
