Fritsch Forage Facer

Strongest, longest-lasting facer in the world (trusted by farmers in 27 countries)

- Clean cuts, less air, better feed
- Quickly removes feed from the bunker face
- Different widths available: 6, 8, 10, and 12 feet
- Two Char-lynn wheel motors with chrome shafts, made in Oklahoma
- Double taper roller bearings
- All-the-way-through induction-hardened teeth deliver aggressive performance with no jumping
- Facer heads are clamped on, allowing easy boom length or quick-tach changes
- Bucket or boom mounted, length to match your needs
- 3/4" high-pressure hoses

6' 8' 10' 12'
SIZES AVAILABLE

Fritsch Power Bedding Groomer

Fritsch Power Bedding Groomers are designed to break up hard, compressed bedding for more thorough grooming. Its durable, non-skid design digs in deep rather than riding over bedding material, creating softer beds and improving cow comfort.

Fritsch Safety Rake

Reach high feed piles and help prevent avalanches

Designed to pull silage down from bunker faces in a controlled manner, reducing the risk of avalanching and improving operator safety. It's also highly effective for reclaiming compacted fertilizer and salt piles.

- Uses hardened, replaceable teeth.
- Quick-taches are available
- Different widths and lengths (up to 40 feet)

Fritsch High Dump Bucket

Load the center, not the edge

- Designed for loading trucks and mixers
- Fits skid loaders and farm tractor loaders
- Ideal for materials that are free-flowing
- Dumping clearance typically increased 4 ft or more versus standard buckets
- Greasable pivot pins for long-lasting performance
- Comes with a spring hose holder
- Available in widths: 60, 66, 72, 78, 84, 90, and 96"

Fritsch Manure Scraper

- Available in 6- to 9-ft widths
- Equipped with a universal quick-tach for easy equipment changes
- Heavy duty rubber tire construction

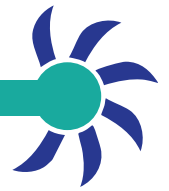

Fritsch Front 3-Point Hitch

Category 1 3pt. hitch for front of compact tractors

- Fits most tractors in the 20-40 hp. range
- 2,000-lb max. lift
- Power up/down or power up with float, providing controlled operation for feed pushing application
- Available with hydraulic 3rd arm linkage

Fritsch Brush Grapple

- 20, 24, 28, 32, and 36" lengths
- Bolt or weld on to your existing bucket
- 4 grease zerks
- 3,000-lb Cylinder

Fritsch Push Away™ Grapple

Adjustable width grapples can be added to your bucket or purchased with a bucket

- Fill a bucket with haylage in under 10 seconds
- Heavy-duty hydraulic cylinders provide the force needed to penetrate hard-packed feed in bags
- Secondary hydraulic cylinders automatically activate at the end of the grapple stroke to push away from the pile, cleanly separating the load from the feed face
- Delivers up to 12 tons of Push Away™ force
- Equipped with specially designed, replaceable hardened teeth
- Leaves the feed bag with a full bucket every time

Fritsch Feed Plows

Feed is kept in front of the cows—not pushed into the alleys

- 8 ft poly feed push-up plow with floating hitch
- 2 ft tall poly blade with replaceable wear shoes (standard on 3-point models)
- 27" plow markers for consistent feed placement
- Invertible plow wings for extended service life
- Universal skid loader mount standard
- Additional configurations and styles available

Fritsch Bale Mover

- Shown with universal skid loader mount
- All Fritsch Bale Movers are equipped with German-made tines
- Available in multiple sizes and configurations
- Custom heavy-duty models available for wheel loaders and telehandlers

The only mattress that rivals sand bedding.

Mayo Mattress

Why Mayo Mattresses are superior to traditional mattresses

- Consistent comfort for livestock
- Approximately 1-3/4" of air cushioning, reduces pressure points and improves cow comfort
- Single-layer construction
- Cannot collapse or harden over time
- Excellent insulation
- 100% waterproof—eliminates moisture retention that can cause bacterial growth
- Easy to clean for optimal hygiene
- Maintains shape—won't dish or hollow
- No top cover needed

Mayo Maxi Bed – Tie-Stall Matting

Trusted worldwide for more than 20 years, the Mayo Maxi Bed provides a soft, stable and long-lasting resting surface for cows (known to last 15 years or more). As a Mayo product, it retains its comfort, maintains its shape, and remains hygienic throughout its entire lifespan.

Condon Engineered Stalls

Maximize cow comfort without sacrificing durability

- Cow comfort drives performance: Properly engineered flex and stall positioning encourage cows to lie down longer, improving rumination, hoof health and milk production
- Built to last: Heavy-duty materials and smart design provide strength where cows apply pressure, while softer contact points reduce stress and injury
- Space efficiency: Thoughtful stall geometry helps cows position naturally, improving stall usage and barn efficiency

Available in multiple styles and sizes, Condon Stalls are built to meet the specific needs of modern dairy and livestock operations—promoting animal health while maximizing space utilization. Each stall is engineered for durability, easy installation and long-term performance.

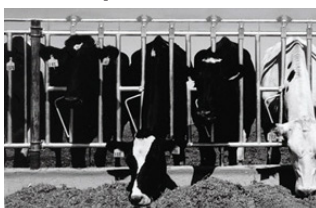

Available in Green, Blue and Red

J&D Headlock Systems

The J&D Headlock Systems are built for strength, versatility and cow safety. Panels are constructed from heavy-gauge galvanized tubing for added durability. Veterinarians and the farm team love these systems for pregnancy checks, blood tests, vaccinations, health inspections, heat detection, and artificial insemination. Comfortable, secure confinement reduces stress on the animal, making routine handling safer and easier.

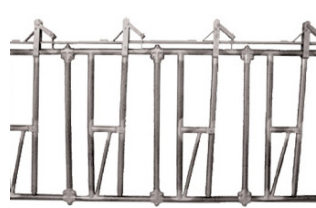

Superlock Panel

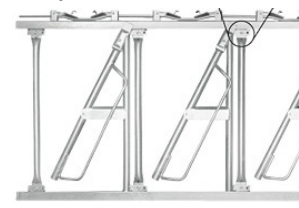

Square Tube Superlock

Auto Release Panel Headlock

Adjustable Headlocks

Fritsch Calf Hutch Front

This durable metal front panel is designed for calf hutches, providing strength, convenience and improved sanitation. Customers supply wire cattle panels for the sides, while the Fritsch front ensures reliable performance in all seasons.

- 1/2" steel rod around the perimeter, doubled at the legs, for strength and easy removal from frozen material
- Wire panels are off the ground to prevent freezing and reduce corrosion
- Secure eyelet keeps panels together when calves push, yet allows easy removal—no ties or straps needed
- Zinc-plated steel surface for easy cleaning and sanitation

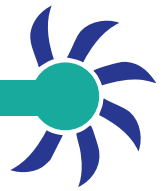

Poly Calf Stalls

- Rod swing gate fronts, available with or without back panel
- Modular interlocking panels with stainless steel hardware
- Quick, bolt-free setup—comes fully assembled
- Patented folding pail holder for easy stacking and multiple pail sizes
- Includes 3/8" zinc-plated rod bottle holder
- Complete front gate and frame are zinc-plated for durability
- Swing gate can be used inward as a squeeze chute
- Available in widths: 36", 42", 48"; lengths: 4'-8'

Calf Flooring Available: Tenderfoot® Flooring Systems for superior animal comfort and safety. Contact us today for details.

Rissler Fast Feed TMR Mixer

- Chrome-plated knives spaced 4" apart for cutting and mixing hay from small or large square bales
- Faster mixing and unloading for improved efficiency
- Baffle system prevents feed separation
- Wider magnet and discharge chute
- Easy-to-change hay cutting knives
- Safety cable and bumper help prevent accidents
- Larger 11" discharge auger for faster feed distribution
- Hydraulic door opener
- Larger fuel tank options: 2-1/4 gallons (18 HP) with easy-fill access or 5 gallons (23 HP)

Rissler TMR Cart

- Full hydraulic power driven by a quiet, efficient air-cooled engine
- Quiet-running T-rod chain with 16,000-lb tensile strength for exceptional service life
- Joystick-controlled, independent hydraulic wheel motors eliminate drive chains, sprockets, and bearing maintenance
- Zero-clearance turning radius for superior maneuverability
- Fast mixing time (2-5 minutes)

Pella Weigh Scales

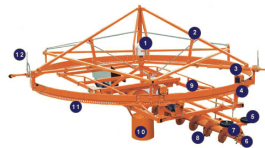

- Built for use in severe environments
- Separate 4-digit LCD for weight and preset indicators
- Tare key allows zeroing by ingredient
- Battery backup ensures uninterrupted operation
- Record-keeping options: on-screen display or optional printer

Valmetal Silo Unloaders

Well suited to modern livestock feeding systems, these silo unloaders are backed by Valmetal's reputation for quality construction and advanced automation support.

Unloader 2000

Unloader 970

Hanson Silo Unloaders

Engineered with robust augers and drive systems, these unloaders cut, chop and convey silage or grain from large-diameter silos with uniform distribution and high capacity—reducing manual labor and feed waste.

Twin-Trac

Mega-Trac

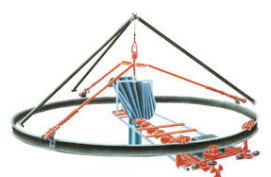

Super-Trac

Posi-Trac

Maxx-Trac

Valmetal Silage Roller Mill

- 16" x 16" high-carbon steel rolls, hardened for durability
- 2" stress-proof steel shafts
- Positive differential drive with triple V-belt
- Hinged hopper for easy access to rolls
- Trap-bottom funnel for easy cleaning (optional)
- Heavy-duty leaf spring protection
- Adjustable roller cleaner
- Polyethylene inner liners to prevent clogging and packing
- Capacity up to 1,200 lbs per minute with a 7.5 H.P. motor
- Dual capability – processes both corn silage and high-moisture corn

Lamb Creep Feeder

- Ideal for outdoor feeding of young lambs.
- Lightweight and portable for easy transport and filling
- Double-sided feeding with 24 total feed spaces
- Equipped with solid rubber wheels (280mm x 60mm)
- Adjustable feed spacing to accommodate lambs of different sizes
- Spring-loaded easy-exit feature reduces the risk of head trapping

Valmetal Four Auger Trailer Mixer

Built for heavy-duty performance, the Valmetal Four Auger Trailer Mixer features reinforced construction throughout.

- Block valves compatible with tractors that have a single set of hydraulic outlets
- UHMW or stainless steel bottom and side liners
- Manual flap & Hydraulic flap
- Magnets in discharge flap
- Special discharge conveyor lengths
- Available as a stationary-mount version

Valmetal Zago TMR Mixers

The KING FEEDER – a TMR Mixer/Distributor designed to handle all types of fibrous products, including large round hay bales. This allows producers to deliver a true Total Mixed Ration (TMR) to their cows, ensuring maximum nutritional benefits.

- Electronic scale
- Printer
- Extended conveyor
- Hydraulic conveyor lift
- Electro-hydraulic controls
- PTO shaft
- Reversible auger rotation
- Universal automatic back-cutter loader

CD model

SD model

Remlinger 600 Bale Slicer

- Cuts bales of hay, straw or silage quickly and efficiently
- Suitable for indoor or outdoor feeding and bedding of pens
- Fits most skid steer loaders, with an optional 3-point hitch for category 2-3 tractors
- Picks up, carries and slices bales

BuckRake Feed Mover

- Available in 8-, 10-, and 12-foot lengths
- 3-point link mounting bracket for easy attachment
- Moves up to 4.5 tons of silage at once
- Manufactured for full-on use in haylage and corn

Rissler Hydra-Mix

Reel-Type Tumble Mixer

- 1/4" steel drum with stainless steel liner
- Stainless steel auger trough
- Reversing reel and auger
- Variable-speed unloading
- Adjustable hydraulic relief
- No shear pins
- No ball bearings to fail on reel or auger
- Hay knives spaced 12" apart for effective processing of dry hay
- Gentle tumble mixing action ensures uniform feed

Rissler Electra-Mix™

Heavy-Duty TMR Mixer

- 1/4" steel drum with stainless steel liner
- Stainless steel auger trough
- Reversing reel and auger
- Variable-speed auger
- Hay knives spaced 12" apart for effective processing of dry hay
- Gentle tumble mixing action for uniform feed
- Dual mixing action – reel moves feed toward the discharge end while the auger moves feed away, effectively eliminating dead spots

Rissler Stationary TMR Mixer

Designed for efficiency, this stationary mixer provides fast top-loading of forages and grains and easy unloading.

- Open top for easy conveyor setup and convenient filling from silage bags
- 1" poly-clad plywood sides
- Stainless steel floor
- Hardware magnet on discharge chute
- Emergency shut-off cable mounted on three sides for immediate access
- Fast mix time (2-5 minutes)
- Easy-running mixing action allows operation immediately after loading

Valmetal Bale Processor 6616

- Unique, energy-efficient design with low horsepower requirement
- Fixed-position grill with adjustable rotor
- Processes both round and rectangular bales
- Inclined design for low power use and easy loading
- Efficient and clean operation
- Manual or automatic controls available

Steffen Systems 8520 Square Bale Handler

The 8520 features four solid 1.5" high-test steel hook bars with a total of 16 big-bale teeth, designed to handle:

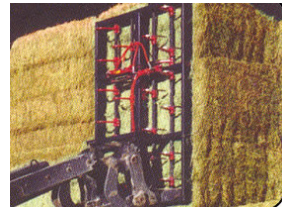

- Three 3×3 bales
- Two 3×4 bales
- Two 4×4 bales

Sealed bearings in all three rails make this model extremely rugged and durable for heavy-duty use.

Steffen Systems 3VHD Bale Handler

Designed for high-volume hay producers, the 3VHD is a top-of-the-line big bale handler. It features a heavily reinforced frame, four hook shafts, and ten additional teeth for secure handling. The solid 1.5" diameter spears are available in 24", 40", 54", and 63" lengths to accommodate different bale sizes. This unit delivers ultimate durability and precise control for efficient hay handling.

Steffen Systems 3V Bale Handler

One of Steffen Systems' most popular models, the 3V allows you to unload big bales from the side of a truck or stack with ease. Its solid 1.5" diameter spears are available in 24", 40", 54", and 63" lengths to accommodate different bale sizes. This reliable handler makes handling big bales simple, efficient and stress-free.

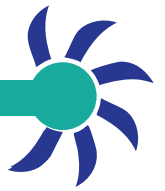

McHale 994 Bale Splitter

With the knife in the upper position, this bale splitter can spike and transport bales from the stacking area to the feeding area. Once at the feeding area, a single cut with the specially designed knife splits the bale. The tines can then be used to move the different sections of the bale to multiple locations.

In addition to round bales, the McHale 994 can also be used to split green chop, hay or straw, making it a flexible solution for all your feeding needs.

Woodchuck Spreader

The Woodchuck® spreads sawdust, shavings, sand, and other materials in a matter of minutes. It adapts easily to most skid steer loaders and 3-point hitches, allowing you to complete your bedding as a one-person operation. The spreader delivers a uniform pattern to the front of the stall, and spinners on both sides let you distribute material to the left or right.

- Provides years of dependable service
- Suitable for compost, sand, straw, wood chips, sawdust and shavings
- Compatible with most quick-tachs and 3-point hitches
- Features direct-drive spinners and cross auger, with no belts to maintain

Valmetal Bedding Chopper

The ingenious design of the rotor shaft and knife discs creates a spiral pattern for smooth operation while requiring less horsepower. Valmetal Bedding Choppers can be powered by gas engines or electric motors, and three-point hitch models are also available.

- Knives are easily reversed or replaced through the rear access door
- Blade reversal or replacement can be completed in 30 to 45 minutes using the supplied rotor wrench
- Smooth knife spacers help reduce the chance of twine wrapping around the rotor shaft

Rissler Round Bale Feeders

Hydraulic Drive Round Bale Feeder

- Joystick controlled for easy operation
- Removable platform for convenience
- Left and right discharge for flexible feeding

Rissler Model 336 Large Square Bale Mover

- Load handling capacity: 2,000 lbs
- Hydraulic tilt bed: 38" W x 7' L
- Key-start 9 hp Honda engine
- Joystick hydraulic steering for precise control
- Additional sizes available

Cattle Brush

- High-sensitivity activation starts automatically on contact and stops when not in use
- Integrated safety protection with automatic power shutoff in the event of a fault
- Multi-angle, full-rotation design allows operation in any direction for maximum cow access
- Advanced best-in-class power-balancing system ensures smooth, stable operation
- Automatic reverse function protects cows if a tail becomes entangled

Ritchie & Miraco Waterers

We sell the full line of Ritchie and Miraco waterers and accessories.

FortiFlex Pails

- FortiFlex is recognized as a quality leader for pails, tubs and industrial containers
- Heavy-duty, long-lasting construction
- Known for durability and reliability in demanding environments

Quick Tachs

Custom quick-tach systems built for compact tractors

We offer quick-tachs to fit a wide range of skid loaders, wheel loaders, telebooms, farm tractors, and compact tractors. If a configuration isn't available, we'll build it to fit.

Stucci™ and Faster® Hose Couplers

We offer a wide range of high-pressure coupling plates, hoses and couplers, allowing simultaneous connection and disconnection of hydraulic lines—even under pressure. We also sell Stucci hydraulic parts.

J&D and Schaefer Ventilation Products

- Mistig systems: high- and low-pressure options
- Evaporative coolers
- Portable cooling fans
- Environmental Controls
- Indoor / Outdoor Heating
- Hoods and Transition Units
- Replacement Motors
- J&D Fans—All models including the Barnstormer

We carry parts and accessories made by Batco, Hanson and Badger. Contact us for details.

Count on Fritsch

Fritsch Equipment & Services has been a trusted name in the agricultural industry for more than 50 years. We specialize in high-quality, innovative equipment designed to meet the unique needs of today's farming operations. As a proud farmer-founded company, we understand the challenges and opportunities in agriculture, and we are dedicated to delivering solutions that make your work easier, more efficient and more productive.

For more information about our product portfolio and current pricing, please call us at (920) 532-6292 or email: Sales@FritschEquipment.com. We'd love to hear from you!
