

epa.gov/saferchoice

The main ingredient in **SurpHace™** is sodium bisulfate - a dry, granular that boasts unmatched safety for people, animals and the environment.

- General recognized as safe (GRAS) by the FDA for human foods and animal feeds
- Found on the prestigious EPA Safer Choice Program Safer Chemical Ingredient List. Safer Choice helps consumers, businesses, and purchasers find products, that are safer for people, animals and the environment.
- Considered natural by the Grocery Manufacturers Association (GMA) since it is made from minerals
- Produced following a Quality Management System certified to the most current ISO 9001 standard
- Is a GMO-Free, BSE-risk free material

SurpHace IS SAFE FOR ANIMALS, PEOPLE AND THE ENVIRONMENT

SurpHace is free of heavy metals and toxins, and when applied to bedding in livestock barns or in footbath water, it breaks down into products naturally found in the environment (hydrogen, sodium and sulfate).

Unmatched safety is just one reason more farmers rely on **SurpHace** for their environmental management needs.

THE SAFETY OF

SurpHace™

Performance Starts with pH

The proof is in the sauce, syrup, strudel, and countless other food items you might encounter each day.
