FOR IMMEDIATE RELEASE:

The new **NJ Phillips VS Injector** from **Datamars Livestock** is the ultimate all-in-one injector. This high-quality vaccine syringe stands alone, combining complete flexibility and safety features to deliver accurate, fixed dose volumes for a variety of vaccines and medications.

The balanced, ergonomically designed handle-set provides a natural grip and improved control and prevents “trigger finger” during high-volume use. The injector can be boiled to comply with sterilization protocols.

The versatile **VS Injector** is completely interchangeable and can be easily configured as a bottle mount or tube fed syringe for all types of injections. Dose chambers of different volumes are available and colored identification bands make it easy to match the injector to a specific treatment.

Users now have one top of the line device to protect the health of their livestock however they need to. When it comes to quality, versatility, accuracy, and safety no other injector compares to the **NJ Phillips VS Injector**.

About Datamars Livestock

Datamars Livestock is the global leader in animal identification, product performance, monitoring, animal health delivery systems, and farm infrastructure devices providing precision livestock management solutions.

Datamars Livestock includes globally recognized brands like Z Tags, Temple Tag, Tru-Test, Speedrite, Patriot, NJ Phillips and Simcro.
