

UNITED IN CARE

USVET
VETERINARY PRODUCTS

More than a headline. It's our mission.

Animal health and dairy farming are built on relationships. Our ongoing commitment to farmers, veterinarians, and distribution partners is what helps us all build promising futures. While US VET is in business to manufacture products you can trust, it's our dedication to the essential and vibrant dairy industry that matters most. Our Quartermaster® Suspension, Ampicillin Trihydrate, and full range of dairy-focused medications are just the beginning. United in our care for animals and united in our commitment to the farming communities we serve, we are US VET.

The makers of
Quartermaster®
Suspension
Penicillin G Procaine and Dihydrostreptomycin
Sulfate Intramuscular Injection
